

Sanken Group Quality Policy

The 1st edition

“Philosophy”

We, the Sanken Group of companies, pursue the highest level of quality, as measured by our customers, through constant innovations in product technology and production processes.

“Operating Principles”

To put our philosophy into action, we will act as follows:

1. We will develop and market highest quality electronic products to contribute to the betterment of society.
2. We will satisfy customers' quality requirements on a timely basis through effective teamwork within all areas of the organization and consistent application of our quality management system.
3. Our quality management system will be continually improved through a formal process of management review and feedback from our quality assurance network.
4. We will comply with legal, regulatory and other requirements.
5. We will plan and implement quality improvement initiatives, including human resource development programs, and monitor their progress.
